SHIRODA, GOA – 403 103

DEPARTMENT OF INFORMATION TECHNOLOGY

2021 – 2022

**“DETECTION OF FLORAL LEAF AFFLICTION USING IMAGE
PROCESSING TECHNIQUES”**

By

Mr. Abhijeet Singh Shekhawat

Mr. Karan Panchal

Miss. Aditi Sawant

Mr. Omkar Prabhu Dessai

Under the Guidance of

Mrs. Manjusha Sanke

Assistant Professor

SRIEIT, Shiroda-Goa

BACHELOR OF ENGINEERING: GOA UNIVERSITY

Shivgram Education Society's
SHREE RAYESHWAR INSTITUTE OF ENGINEERING & INFORMATION TECHNOLOGY
SHIRODA, GOA – 403 103

2021 - 2022

CERTIFICATE

This is to certify that this dissertation entitled
**“DETECTION OF FLORAL LEAF AFFLICTION USING IMAGE
PROCESSING TECHNIQUES”**

Submitted in partial fulfillment of the requirements for Bachelor's Degree in Information
Technology of Goa University is the bonafide work of

Mr. Abhijeet Singh Shekhawat

Mr. Karan Panchal

Miss. Aditi Sawant

Mr. Omkar Prabhu Dessai

MRS. MANJUSHA SANKE

ASSISTANT PROFEESOR

MRS. MANJUSHA SANKE

HEAD OF DEPARTMENT

DR. SHAILNDRA ASWALE

PRINCIPAL

**Shivgram Education Society's
SHREE RAYESHWAR INSTITUTE OF ENGINEERING & INFORMATION TECHNOLOGY
SHIRODA, GOA – 403 103**

2021 - 2022

CERTIFICATE

**The dissertation entitled,
“DETECTION OF FLORAL LEAF AFFLICTION USING IMAGE
PROCESSING TECHNIQUES”**

submitted by,

Mr. Abhijeet Singh Shekhawat

Mr. Karan Panchal

Miss. Aditi Sawant

Mr. Omkar Prabhu Dessai

**in partial fulfillment of the requirements of the Bachelor's Degree in Information
Technology of Goa University is evaluated and found satisfactory.**

EXAMINER 2: _____

ACKNOWLEDGEMENT

An Endeavour over a period of time can be successful only with the constant support and guidance from our well-wishers, hence we take this opportunity to express our gratitude to all those who encouraged us in getting a head start on our project work.

We are immensely grateful to our Principal, **Dr. Shailendra Aswale** for providing the needed facilities creating a comfortable environment required for the project.

Our sincere gratitude to our internal guide, **Mrs. Manjusha Sanke**, Head of the Department and Asst. Professor, IT Department and for providing us with excellent guidance, direction and constant support in organization, planning and scheduling the project phases.

We would like to thank **Mrs. Prajakta Tanksali**, project coordinator, IT Department, for her support in organization, planning and scheduling the project phases.

Besides we are also grateful to our friends and well-wishers who provided us with lots of support.

Lastly, we are grateful to whole of the Information Technology staff for providing us with the lab facilities and co-operation for our project.

ABSTRACT

Diseases in plants cause reduction in quality as well as quantity of agricultural products. Plants are prone to various diseases which may be caused by environmental conditions, bacteria, light, fungus, etc. These diseases have some physical characteristics on the leaves, stems, and fruit, such as changes in natural appearance, spot, size, etc. Due to pattern similarity, distinguishing and identifying category of plant disease is the most challenging task. Therefore, efficient mechanisms should be discovered so that accurate identification and prevention can be performed to avoid losses of the entire plant. Diagnosing floral leaf diseases in an accurate and timely way is of the utmost importance.

This project provides a solution for detecting floral leaf affliction using image processing techniques together with feature extraction process, neural network model and classification method. The dataset of the plant leaf images are trained in python tool and classified into various clusters which classifies various labels. Convolution Neural Networks is designed for accurate analysis. Based on the feature extraction parameters, the algorithm predicts whether the leaf is healthy leaf or diseased one. The outcome of the proposed study justifies the scope of the proposed system in terms of accuracy towards the classification of different kinds of plant leaf diseases.
